

INTER PROSTHETIC FEMORAL FRACTURE CASE 2

Super nail GT is a femoral nail designed to treat proximal femoral fractures, trochanteric fractures and subtrochanteric fractures.

AT A GLANCE

Patient information

60 year old male who had a fall from 8 meters

Injuries sustained

Fractures to L2,L5 Bilateral unstable pelvic injury with lumbosacral dissociation and a proximal femoral fracture

Treatment

Supernail GT for femoral fracture then anterior access to the symphysis and finally lumber and spinopelvic stabilisation

PRE OP

POST OP

Discussion

This gentleman had a significant fall with multiple injuries. The proximal femoral fracture was treated first then the pelvis was addressed with first anterior access to the symphysis which was stabilized with a plate then two screws for the lumber spinopelvic stabilization.

Surgeon

Dr Di Giacomo currently works at the trauma and orthopaedics, Azienda Ospedaliera di Perugia. Dr Di Giacomo does research in Sports Medicine, Traumatology and Orthopaedic Surgery. He is an active member of the AO trauma society, SIOT and SIFE
